The diagram shows a hand-drawn outline of a breast specimen. At the top, a line points to the upper part of the breast with the label "Transition Dissection between Superficial and deep planes of dissection". Below this, a line points to the skin surface with the label "Superficial plane of dissection". On the left side, a line points to the outer edge of the breast with the label "Tissue periphery". In the center, a line points to the internal structure with the label "Superficial plane of dissection". At the bottom, a line points to the base of the breast with the label "Dissection plane". The entire diagram is labeled "Breast Tissue Specimen with Nipple" at the top.
